

Math Interventionist

Pius XI Catholic High School is seeking a Math Interventionist who will provide specialized instruction in mathematics to help students meet growth objectives. They will work closely with the math department and leaders to implement student success support programs in mathematics.

Duties and Responsibilities of the Math Interventionist:

- Support students in assigned math intervention courses using STAR data and math class performance to inform instructional moves.
- Provide small group and individualized instruction to students in a 5:1 teacher to student ratio to close gaps in learning and help students keep up with current math courses
- Communicate regularly with concerned teachers and parents about the progress of each student
- Use ALEKS to assign and track additional support work for students outside of intervention meeting time
- Support student success in math courses through individual relationships and social emotional support. This includes, but may not be limited to visiting their math courses to provide support as needed
- Track current topics being taught in relevant math courses
- Participate in all math department meetings

Required Knowledge, Skills and Abilities:

- Must be able to use test data and teacher reports of class performance to design small group and individualized intervention for students
- Working knowledge of Renaissance STAR, Skyward and Schoology
- Demonstrated success with student interventions
- Working knowledge of Algebra 1, Geometry, Algebra 2

Desired Qualifications:

- Bachelor's degree in education or a related field from an accredited four-year college/university; Master's degree preferred
- Appropriate math education license (1400)

Licenses: Mathematics

Additional Requirements: Resume, Transcripts, Licenses/Certifications, 3 Letters of Recommendation

Please submit resume, letter of interest, copies of college transcripts, and 3 letters of reference to amagernans@piusxi.org
